

CONGRATULATIONS MESSAGE FROM PRINCESS CHULABHORN SCIENCE HIGH SCHOOL
NAKHON SI THAMMARAT, THAILAND

December 4, 2013

Dear All teachers, and students of Nara Prefectural Seisho High School,

On the occasion of the new academic year 2014, we are pleased to send our sincere congratulations to all students and teachers of Nara Prefectural High School of Mathematics and Science, Super Science High School. We are proud of having a memorandum of understanding for developing cooperation between our two schools.

Both Nara, an ancient capital of Japan, and Nakhon Si Thammarat, an ancient city of Thailand, are rich in our cultural heritages. We sincerely hope that our activities and exchange programs will not be only in education in mathematics and science, but also in culture. We believe that our cooperation will lead to strengthening friendship among the future generations of our two cities, and our two countries, Japan and Thailand.

It is also a great pleasure to hear that Nara Prefectural Seisho High School will amalgamate Seisho junior high School to Seisho School next April. So, we are pleased to send our sincere congratulations to all students and teachers of Nara Prefectural Seisho High School of Mathematics and Science (Super Science High School).

We would like express our sincere thanks and appreciation of the visits of the Principal, Mr. Yasuyuki Araki, in 2012, and many teachers to our school in 2013, with demonstration classes to our students and teachers.

Once again, congratulations and we look forward to having more activities via the Skype and more visits among members of the two schools both junior and senior high school in 2014 and the years to come.

Sincerely,

Pirat Wongnatkul
Principal of Princess Chulabhorn Science High School
